## AI System Launched in Pench Tiger Reserve for Detection of Forest Fires

Pench Tiger Reserve in Maharashtra has deployed Pantera, an AI-powered forest fire detection system. It uses a high-resolution camera and satellite data to provide real-time alerts, distinguish between smoke and clouds, and predict potential fires. This initiative is a collaboration between multiple organisations and is expected to significantly enhance fire management and protect the reserve's ecosystem.

## Five soldiers swept away in Shyok River

Five Army personnel died during a training exercise in eastern Ladakh when their tank got stuck in the Shyok River due to high currents and rising water levels. Despite efforts to rescue, the strong currents hindered all attempts. The Shyok River, originating from the Rimo Glacier in Ladakh, is a tributary of the Indus River. The river journeys southeastward, then alters its course towards the northwest, ultimately merging with the Indus River in Pakistan.

### Snowblind Malware

Snowblind, a recently discovered Android malware, utilises the "seccomp" security feature to circumvent anti-tampering protections implemented in banking applications. It modifies legitimate applications, allowing it to capture login information, bypass security measures like two-factor authentication, and view the user's device remotely. Primarily active in Southeast Asia, Snowblind infects devices through untrusted app sources.
