## New Atlas Maps Skeletal Development and Genetic Insights

A new atlas mapping human skeletal development provides insights into bone formation, genetic links to arthritis, and conditions like craniosynostosis. Researchers from the Wellcome Sanger Institute used advanced genomic techniques to identify cells involved in early skeletal development. The study, published in Nature, highlights how cartilage acts as a scaffold for bone growth and explores genetic mutations linked to conditions like hip arthritis and skull malformations, offering potential diagnostic and therapeutic targets.

## One Health and Climate Hub to Tackle Climate Change Health Impact

Tamil Nadu is set to create a 'One Health and Climate Hub' to address health risks associated with climate change. The hub will focus on studying diseases worsened by climate change and develop AI-driven predictive models for future disease patterns. Its goal is to tackle the interconnected health issues affecting humans, animals, and the environment. This initiative underscores the state's dedication to building a resilient healthcare system in response to rising temperatures, zoonotic diseases, and the loss of biodiversity.

comment below your score, considering each question has 1 mark only. If you scored 8 to 10, congratulations! You are one step closer to selection. If you have scored 5 to 8 marks, then you are doing well, keep it up. If you have scored less than 5 marks then you need to work a little harder on this subject. But don't worry, we are here to help you master the subject.

Keep trying! We will meet again with another set of questions in daily current affairs quiz.
