- The preliminary exam will consist of 100 questions worth 1 mark each.

# SBI Clerk 2023 Marks Normalization

Shall we start by gaining an understanding of what marks normalization entails? Essentially, it is a statistical technique used to compensate for any variations in question paper difficulty that may arise across different shifts of the same exam. Given that different shifts can present differing levels of question complexity, a straightforward score comparison may not be fair. Therefore, normalization steps in to level the playing field, ensuring a more equitable evaluation of candidates.

SBI follows the **equi-percentitle method** to do the marks normalisation for the SBI clerk examination 2023. The formula for the same is:

- **Your percentile rank**= {(Total number of students in a slot)-(Your rank in that slot)/ (Total number of students in a slot − 1)} x 100.

Using the above formula, your percentile rank will be determined. However, the cut off is determined on the basis of the number of vacancies released by SBI. If your percentile rank exceeds the determined cut off, you will qualify for the next round.

Now that we have provided you with complete clarity on the Marks Normalization process, how about we provide you with information about the SBI Clerk application process?
