, you can visit our blog by clicking on the embedded link. Now that you are familiar with the SSC CHSL Tier 2 Syllabus and its Exam Pattern, we will offer you a brief overview of the marking scheme and marks normalization, which are vital aspects of your preparation.

SSC CHSL Tier 2 Syllabus - Marking Scheme

Now that you have all the details about the SSC CHSL Tier 2 Syllabus and its exam pattern, let's examine the marking scheme. To get a clearer picture, consider the following:

- In Tier 2, you will receive 3 marks for each correct answer.
- However, there will be a negative marking of 1 mark for each wrong answer in Section I, Section II and Module I of Section III.

Shall we now move on to discuss marks normalization for the SSC CHSL Tier 2 examination?

SSC CHSL Tier 2 Syllabus - Marks Normalization

Let's begin by defining the concept of marks normalization. This is a statistical technique employed to compensate for any differences in the difficulty levels of question papers across various shifts of the exam. Comparing scores directly between shifts would be unfair due to these variations in question complexity. Normalization ensures that scores are equalized, enabling a more precise evaluation of candidates and resolving this discrepancy.

In 2019, the Staff Selection Commission introduced the normalization formula in
Notice No.1-1/2018-P&P-I dated 07-02-2019
, which has been in use since then. These normalized scores are subsequently used to determine the final merit list and cut-off marks.

As we conclude our discussion on the SSC CHSL Tier 2 Syllabus, it's important to emphasize the significance of time management and accuracy for competitive exams such as the SSC CHSL. Focus on understanding concepts, practising regularly, and increasing speed while maintaining accuracy.
