## SSC JHT Marks Normalization 2024

What is meant by "marks normalization"? It is a statistical technique used to adjust for variations in the difficulty levels of question papers across different shifts of the same exam. Since questions in different shifts may vary in difficulty, directly comparing scores might be unfair. Normalization balances these differences by standardizing scores, ensuring a fairer evaluation of candidates.

Furthermore, scores from the JHT computer-based test will be normalized according to the formula specified by the Commission in [Notice No.1-1/2018-P&P-I dated 07-02-2019](#). These adjusted scores will then be used to establish the final merit list and cut-off marks.
