It has been solved and explained by KD Live Experts under the guidance of Neetu Mam and they have tried to elaborate the concept used in Basic Hardware And Software Questions.

Question On Basic Hardware And Software

Which of the following is a type of operating system?

Difficulty : Moderate

Average Time : 32 Seconds

Basic Hardware And Software Questions Options

1. Batch Processing Operating System
2. Distributed Operating System
3. Time Sharing Operating System
4. All of the above

Basic Hardware And Software Questions Solution

The correct answer is **option 4** i.e. **All of the above**.

- An operating system is a type of software without which you cannot operate or run a computer.
 - It acts as an intermediary or translation system between computer hardware and application programs installed on the computer.
 - Some of the types of the operating system are as follows:
1. **Batch Processing Operating System:** The users of a batch operating system do not interact with the computer directly. Each user prepares his job on an off-line device like punch cards and submits it to the computer operator.
 2. **Time-Sharing Operating System:** Time-sharing is a technique which enables many people, located at various terminals, to use a particular computer system at the same time. Time-sharing or multitasking is a logical extension of multiprogramming.
 3. **Distributed Operating System:** Distributed systems use multiple central processors to serve multiple real-time applications and multiple users. Data processing jobs are distributed among the processors accordingly.

Network Operating System: A Network Operating System runs on a server and provides the server the capability to manage data, users, groups, security, applications, and other networking functions.

5. **Real-Time Operating System:** A real-time system is defined as a data processing system in which the time interval required to process and respond to inputs is so small that it controls the environment. The time taken by the system to respond to an input and display of required updated information is termed as the response time.

Basic Hardware And Software Questions Tips and Tricks

1. Try to solve Basic Hardware And Software Questions without taking any help from the solutions.
2. Basic Hardware And Software Questions require proper usage of concept so firstly read the question thoroughly and then use the right concept.
3. In case you're not able to solve the question in less than 30 seconds in the exam then you should skip the question and move to the next question.
