

Rrb Ntpc CBT - 2 Previous Year Question Paper Overview

Here, you can solve all the questions asked in Rrb Ntpc CBT - 2 Previous Year Question Paper on 2022-05-09 in the Evening exam. The detailed solutions are also provided for every previous year question and some of these questions can be asked again in your Rrb Ntpc CBT - 2 exam. There are 120 questions in the exam and 90 minutes are provided for the Rrb Ntpc CBT - 2 exam. The Cutoff of the exam was 78 marks hence you should try to score at least 88 marks.

Rrb Ntpc CBT - 2 Previous Year Question Paper : Questions and Solutions

Question 1 :

Mr . Akhil invested Rs 13,500 in FD .How much will he get on maturity , if he invested it at 20% per annum compound interest for 6 months , compounded quarterly ?

Difficulty : Moderate

Average Time : 45 Seconds

Options :

1. Rs 14,883.35
2. Rs 14,883.75
3. Rs 14,883.5
4. Rs 14,883

Solution :

The correct answer is **option 2** i.e. **Rs 14,883.75**

$p = \text{Rs } 13,500$

$r = 20\% \text{ per annum} = 5\% \text{ (compounded quarterly)}$

$\text{time} = 2 \text{ quarter year (compounded quarterly)}$

formula used -

$$a = p (1 + r/100)^t$$

$$a = 13,500 (1 + 5/100)^2$$

$$a = 1350 \times 441 / 400 = 14,883.75$$

Question 2 :

The mode of the data 3,12,4,6,8,5,4 is :

Difficulty : Moderate

Average Time : 46 Seconds

Options :

1. 5

2. 8

3. 4

4. 3

Solution :

The correct answer is **option 3** i.e. 4

to find out mode we should Arrange the numbers in an order. Then the number which appears most often is the mode .

arrange the number = 3, 4, 4, 5, 6, 8, 12

the number 4 is repeted more time among these number

so mode is 4 .

Question 3 :

Mr . Ayush bprrowed Rs 3000 at 5% per annum compound interest . The compound interest compounded annually for 2 years is :

Difficulty : Moderate

Average Time : 46 Seconds

Options :

1. Rs 370.5

2. Rs 307.5

3. Rs 3307.5

4. Rs 3370.5

Solution :

The correct answer is **option 2** i.e. **Rs 307.5**

$$p = 3000$$

$$r = 5\%$$

$$t = 2 \text{ years}$$

we know that -

$$a = p (1 + r/100)$$

$$a = 3000 (1 + 5/100)^2$$

$$= 3000 (441 / 400)$$

$$= 3307.5$$

we know that

$$c.i = a - p$$

$$= 3307.5 - 3000 = 307.5$$

Question 4 :

Compute : $3108 \div 259 - 10$

Difficulty : Moderate

Average Time : 46 Seconds

Options :

1. 1063/83

2. 2

3. -2

4. 1036/83

Solution :

The correct answer is **option 2** i.e. **2**

$$3108 \div 259 - 10$$

formula used -

applying bodmas

$$3108 \div 259 - 10 = 12 - 10 = 2$$

**Question 5 :**

A shoopkeeper cheats to the extent of 21% while buying and selling fruits , by using tampered weights . His total gain (in percentage) is :

Difficulty : Moderate**Average Time : 41 Seconds****Options :**

1. 53.16
2. 46.25
3. 46.75
4. 46.5

Solution :

The correct answer is **option 1** i.e.**53.16%**

A shoopkeeper cheats to the extent of 21% while buying and selling fruits

actual cost = 100 Rs

he buy fruits on cheating of 21% (c.p) = Rs 79

but when he sell on cheating of 21% (s.p) = Rs 121

profit = 121 - 79 = 42

formula used -

profit% = profit / cp × 100

= 42 / 79 × 100 = **53%**

Question 6 :

Two numbers are in ratio 3:8 and their HCF is 7 . Their LCM is :

Difficulty : Moderate**Average Time : 55 Seconds****Options :**

1. 186

56

3. 21

4. 168

Solution :

The correct answer is **option 4** i.e. **168**

Two numbers are in ratio 3:8

let,

frist no. = $3x$

second no. = $8x$

l.c.m = $3 \times 8 \times x$

h.c.f = 7

h.c.f of $3x$ and $8x = x$

accoding to question

$x = 7$

l.c.m = $3 \times 8 \times x$

l.c.m = $3 \times 8 \times 7 = 168$

Question 7 :

Apurva travelled equal distance at speeds of 10km/hr ., 20km/hr ., 6 km/hr ., and took a total time of 19 minutes . Find the total distance travelled in km.

Difficulty : Moderate**Average Time : 55 Seconds****Options :**

1. 3

2. 1

3. 2

4. 4

Solution :

The correct answer is **option 1** i.e.3

Apurva travelled equal distance at speeds of 10km/hr ., 20km/hr ., 6 km/hr

total time = 19 min = 19/60 hours

formula -

time = distance / speed

equal distance = x km

$$(x/10) + (x/20) + (x/6) = 19/60$$

$$19x/60 = 19/60$$

$$x = 1$$

$$\text{total distance} = 3x = 3 \times 1 = 3$$

Question 8 :

The surface area (in sq. cm) of a sphere with radius 1.5 cm is :

Difficulty : Moderate

Average Time : 50 Seconds

Options :

1. 190/21
2. 190/7
3. 198/7
4. 198/21

Solution :

The correct answer is **option 3** i.e. 198/7

The surface area (in sq. cm) of a sphere

radius = 1.5 cm

Surface area of sphere = $4r^2$ where r is radius of sphere

$$= 4 \times 22/7 \times 1.5 \times 1.5 = 198/7$$

Question 9 :

Mr. Kiran buys a toys for Rs.40 and sells it for Rs.45. Find the gain percentage .

Difficulty : Moderate

Average Time : 44 Seconds

Options :

1. 10%
2. 12.5%
3. 13%
4. 12%

Solution :

The correct answer is **option 2** i.e. **12.5%**

Mr. Kiran buys a toys for Rs.40

c.p = Rs.40

s.p = Rs 45

profit = 45 - 40 = 5

formula used -

gain percentage . = gain / c.p × 100

= 5 / 40 × 100 = 12.5%

Question 10 :

If the mean height of 12 men is 1.70m and the mean height of 8 women is 1.60m, then the total height of 8 women in meters is:

Difficulty : Moderate

Average Time : 48 Seconds

Options :

1. 12.9
2. 12.8
3. 12.4
4. 13

Solution :

The correct answer is **option 2** i.e. **12.8**

formula used -

mean = Sum of total heights of men and women / Total no.of both men and women

the mean height of 8 women = 1.60m

total height of 8 women in meters = $1.60 \times 8 = 12.8$

Question 11 :

Ms. Ayesha borrowed Rs. 1000 at 5% per annum simple interest. What amount (in rupees) will she pay to clear debt after 4 year?

Difficulty : Moderate

Average Time : 53 Seconds

Options :

1. 200
2. 1200
3. 220
4. 1300

Solution :

The correct answer is **option 2** i.e. **1200**

$p = 1000$

$r = 5\%$

$t = 4$ years

we know that

$$s.i = prt/100$$

$$s.i = 1000 \times 5 \times 4 / 100 = 200$$

$$a = p + s.i$$

$$= 1000 + 200 = 1200$$

she pay to clear debt after 4 year = 1200

Question 12 :

Divide Rs.162 in the ratio 2:3:6:7. The rupees in the respective ratios are given by;

Difficulty : Moderate

Average Time : 45 Seconds

Options :

1. 18,27,53 & 64
2. 18,27,54 & 63
3. 18,28,53 & 63
4. 18,27,55 & 62

Solution :

The correct answer is **option 2** i.e. **18,27,54 & 63**

Divide Rs.162 in the ratio 2:3:6:7

let,

$$\text{frist number} = 2x$$

$$\text{second number} = 3x$$

$$\text{third number} = 6x$$

$$\text{fourth number} = 7x$$

according to question -

$$2x + 3x + 6x + 7x = 162$$

$$18x = 162$$

$$x = 162/18 = 9$$

$$\text{frist number} = 2x = 18$$

second number = $3x = 27$

third number = $6x = 54$

fourth number = $7x = 63$

Question 13 :

The volume (in cu.cum.) of a right circular cylinder with radius 2.5 cm and height 2 cm is:

Difficulty : Moderate

Average Time : 55 Seconds

Options :

1. 275
2. 275/21
3. 275/2
4. 275/7

Solution :

The correct answer is **option 4** i.e. **275/7**

a right circular cylinder radius = 2.5 cm

height = 2 cm

volume of a right circular cylinder

$V = r^2h$

$= 2.5^2 \times 2 = 275/7$

Question 14 :

Find the HCF of 2616 and 2289

Difficulty : Moderate

Average Time : 44 Seconds

Options :

1. 109
2. 328
3. 327
4. 108

Solution :

The correct answer is **option 3** i.e. **327**

HCF of 2616 and 2289

$$2616 = 2 \times 2 \times 2 \times 3 \times 109$$

$$2289 = 3 \times 7 \times 109$$

$$\text{h.c.f} = 3 \times 109 = 327$$

Question 15 :

Bhumika takes a total of 8 hours 20 minutes in walking a distance and cycling back to same place where she started. She could walk both ways in 12 hours 15 minutes. The time taken by her to cycle both ways is:

Difficulty : Moderate

Average Time : 45 Seconds

Options :

1. 4 hours 25 minutes
2. 4 hours 35 minutes
3. 4 hours 45 minutes
4. 4 hours 15 minutes

Solution :

The correct answer is **option 1** i.e. **4 hours 25 minutes**

Bhumika takes a total of 8 hours 20 minutes in walking a distance and cycling back to same place where she started
time to cover the distance when he walk = w

time to cover distance by cycling = c

$$w + c = 8 \text{ hours } 20 \text{ minutes} \dots\dots\dots 1$$

$$w + w = 12 \text{ hours } 15 \text{ minutes.}$$

$$2w = 12 \text{ hours } 15 \text{ minutes.} \dots\dots\dots 2$$

multiplying equation 1 by 2

$$2c + 2w = 16 \text{ hours } 40 \text{ minutes} \dots\dots\dots 3$$

equation (3 - 2)

$$2c = 4 \text{ hours } 25 \text{ minutes .}$$

time taken by her to cycle both ways = 4 hours 25 minutes

Question 16 :

Comprehension: In a class of 25 students of mathematics and Computer Science, 12 students have taken Mathematics. Out of this 8 have taken Mathematics but not Computer Science What is the number of students who have both mathematics and Computer Science?

Difficulty : Moderate

Average Time : 68 Seconds

Options :

1. 4
2. 17
3. 2
4. 1

Solution :

The correct answer is **option 1** i.e. 4.

Understanding

In a class of 25 students of mathematics and Computer Science, 12 students have taken Mathematics. Out of this 8 have taken Mathematics but not Computer Science

Students who have taken both the subjects =
(12 - 8) = 4

Question 17 :

Comprehension: In a class of 25 students of mathematics and Computer Science, 12 students have taken Mathematics. Out of this 8 have taken Mathematics but not Computer Science What is the number of students who have taken Computer Science but not Mathematics?

Difficulty : Moderate

Average Time : 52 Seconds

Options :

1. 13
2. 4

8

4. 12

Solution :The correct answer is **option 1** i.e. **13**.**Understanding**

In a class of 25 students of mathematics and Computer Science, 12 students have taken Mathematics. Out of this 8 have taken Mathematics but not Computer Science

Students who have taken both the subjects =

$$(12 - 8) = 4$$

The number of students who have taken Computer Science but not Mathematics = $25 - 12 = 13$

Question 18 :

What is 15% of 38?

Difficulty : Moderate**Average Time : 48 Seconds****Options :**

1. 6

2. 5

3. 5.5

4. 5.7

Solution :The correct answer is **option 4** i.e. **5.7**

15% of 38

$$= 38 \times 15 / 100$$

= 5.7

Question 19 :

The value of $7.7 \div 100 = ?$

Difficulty : Moderate

Average Time : 33 Seconds

Options :

1. 0.0077
2. 77
3. 0.77
4. 0.077

Solution :

The correct answer is **option 4** i.e. **0.077**

The value of $7.7 \div 100$

= $77 / 1000 = 0.077$

Question 20 :

In a class test, a student scored 8 marks out of 25 marks . The student's marks in percentage is:

Difficulty : Moderate

Average Time : 34 Seconds

Options :

1. 32
2. 35
3. 29
4. 30

Solution :

The correct answer is **option 1** i.e. **32**

In a class test, a student scored 8 marks out of 25 marks .

The student's marks in percentage = $(8 / 25) \times 100 = 32$

Question 21 :

The cash difference between the selling price of an article at a profit of 8% and 10% is Rs.3. The ratio of the selling price ?

Difficulty : Moderate

Average Time : 43 Seconds

Options :

1. 54 : 56
2. 54 : 55
3. 54 : 57
4. 54 : 59

Solution :

The correct answer is **option 2** i.e **54 : 55**

The cash difference between the selling price of an article at a profit of 8% and 10% is Rs.3

according to question

$$10\% - 8\% = 3$$

$$2\% = 3$$

$$(c.p)100\% = 150$$

$$\text{the selling price of an article at a profit of } 8\% = 150 \times 108 / 100 = 162$$

$$\text{the selling price of an article at a profit of } 10\% = 150 \times 110 / 100 = 165$$

$$\text{The ratio of the selling price} = 162 : 165 = 54 : 55$$

Question 22 :

Two cycles start from a house at interval of 10 minutes and travel with a speed of 6km/hr. Which how much speed (km/hr) should a women coming from the opposite direction towards the house travel, to meet the cycles at an interval of 8 minutes?

Difficulty : Moderate

Average Time : 58 Seconds

Options :

1. 1.7
2. 1.6
3. 1.5

1.4

Solution :

The correct answer is **option 3** i.e. **1.5**

Two cycles start from a house at interval of 10 minutes ($10 / 60$ hours) and travel with a speed of 6km/hr.

speed of cycle = 6 km / h

a women coming from the opposite direction towards the house travel, to meet the cycles at an interval of 8 minutes. ($8 / 60$ hours) .

solution -

distance between the cycle = ($10 / 60$) \times 6 = 1 km

let the speed of woman = x km / h

the speed of cycle of woman = (x + 6) km / h

$1 / (x + 6) = 8 / 60$

x = 1.5 km /h

Question 23 :

The number of sides of regular polygon whose interior angles are each 168° is:

Difficulty : Moderate

Average Time : 59 Seconds

Options :

1. 20

2. 30

3. 15

4. 31

Solution :

The correct answer is **option 2** i.e. **30**

interior angles = 168°

formula used -

interior angle of a polygon = (n - 2) \times $180 / n$

$$168 = (n - 2) \times 180 / n$$

$$168n = 180n - 360$$

$$12n = 360$$

$$n = 30$$

Question 24 :

An internet bill costs Rs.6 for 2minutes 30 seconds. What is the cost (in rupees) for 3 minutes 20 seconds? (Round up to onne decimal)

Difficulty : Moderate**Average Time : 48 Seconds****Options :**

1. 8

2. 7.9

3. 8.1

4. 8.2

Solution :

The correct answer is **option 1** i.e. **8**

An internet bill costs for 2minutes 30 seconds. = Rs 6

2minutes 30 seconds = 150 sec = Rs 6

the cost (in rupees) for 3 minutes 20 seconds

3 minutes 20 seconds = 200 sec

$(6 / 150) \times 200 = \text{Rs } 8$

Question 25 :

Find the fourth proportion to 14,28,21

Difficulty : Moderate**Average Time : 41 Seconds****Options :**

1. 41

2. 42

14

4. 40

Solution :

The correct answer is **option 2** i.e. **42**

fourth proportion to 14,28,21

$$a = 14, b = 28, c = 21, d = x$$

we know that -

$$a : b : c : d, \quad ad = bc, \quad d = bc/a$$

$$x = 28 \times 21 / 14 = 42$$

Question 26 :

Mr. Ashwani sold a bus for Rs. 510 with a loss of 15% At what price should the bus be sold to get a profit of 15%?

Difficulty : Moderate**Average Time : 54 Seconds****Options :**

1. Rs. 700

2. Rs. 690

3. Rs. 650

4. Rs. 680

Solution :

The correct answer is **option 2** i.e. **Rs. 690**

Mr. Ashwani sold a bus for Rs. 510 with a loss of 15%

let,

$$c.p = x$$

$$s.p = 510 = 85\% \text{ of } x$$

$$x = 600$$

the bus be sold to get a profit of 15% = 115% of 600 = 690

**Question 27 :**

A glass containing water has two holes. The 1st hole alone empties the glass in 9 minutes and 2nd hole alone empties the glass in 3 minutes. If water leaks out at a constant rate, how many minutes will it take if both the holes together empty the glass?

Difficulty : Moderate

Average Time : 55 Seconds

Options :

1. $1/4$
2. $2\ 2/4$
3. $3\ 1/4$
4. $9/4$

Solution :

The correct answer is **option 4** i.e. $2\ 1/4$

A glass containing water has two holes

The 1st hole alone empties the glass in 9 minutes

The 1st hole alone empties the glass in 1 minutes = $1/9$

2nd hole alone empties the glass in 3 minutes.

2nd hole alone empties the glass in 1 minutes. = $1/3$

both hole can empties the glass in 1 minutes.= $(1/9) + (1/3) = 4/9$

total time = $9/4$

Question 28 :

Comprehension: Study the following information carefully and answer the question given below: Subscription to different schemes of Mutual Fund Company over the months in year 2008-2009 (Rupees in Crores) For which of the following type of scheme was there a continuous decrease over the year?

Difficulty : Moderate

Average Time : 61 Seconds

Options :

D

2. A

3. B

4. C

Solution :

The correct answer is **option 1** i.e. **D**

from the table we can clearly see that scheme D was a continuous decrease over the year

decreases in the order = $290 > 150 > 125 > 115 > 100 > 40$

Question 29 :

Comprehension: Study the following information carefully and answer the question given below: Subscription to different Schemes of Mutual Fund Company over the months in year 2008-2009 (Rupees in crore) In which of the following months , the subscription to the scheme B and C was Equal to the subscription to scheme B in February 2009?

Difficulty : Moderate

Average Time : 53 Seconds

Options :

1. December 2008

2. January 2009

3. October 2008

4. September 2008

Solution :

The correct answer is **option 1** i.e. **December 2008**

we can see in the table in the december 2008 the subscription to the scheme B and C was Equal to the subscription to scheme B in February 2009

in december 2008 scheme B = 110

in december 2008 scheme C = 40

in february 2009 scheme B = 150

Question 30 :

Comprehension: Study the following information carefully and answer the question given below: Subscription to different Scheme of Mutual Fund Company over the months in year 2008-2009. (Rupees in Crore) What is the difference in

subscription of scheme A between December and January

Difficulty : Moderate

Average Time : 55 Seconds

Options :

1. 30 Crores
2. 60 Crores
3. 80 Crores
4. 50 Crores

Solution :

The correct answer is **option 3** i.e. **80 Crores**

scheme A in January = 80

scheme A in December = 160

the difference in subscription of scheme A between December and January = $160 - 80 = 80$ crores

Question 31 :

There are total 200 students in a school, of which $\frac{2}{5}$ are boys . find the number of girls in the school

Difficulty : Moderate

Average Time : 43 Seconds

Options :

1. 60
2. 140
3. 40
4. 120

Solution :

The correct answer is **option 4** i.e. **120**

There are total 200 students in a school

boys = $\frac{2}{5}$ of 200 = 80

girls = $200 - 80 = 120$

Question 32 :

18 men built a tanker in 25 days. How many would it take for 10 men?

Difficulty : Moderate

Average Time : 38 Seconds

Options :

1. 45.2
2. 45.1
3. 46
4. 45

Solution :

The correct answer is **option 4** i.e. **45**

18 men built a tanker in 25 days. How many would it take for 10 men?

$m_1 = 18$, $d_1 = 25$, $m_2 = 10$, $d_2 = ?$

formula used -

$m_1d_1 = m_2d_2$

$18 \times 25 = 10 \times d_2$

$d_2 = 18 \times 25 / 10 = 45$

Question 33 :

Akshat is twice as good a typist as Lokesh they finish a piece of work in 7 day. In how many days will Lokesh alone finish the work?

Difficulty : Moderate

Average Time : 49 Seconds

Options :

1. 14
2. 10
3. 28
4. 21

Solution :

The correct answer is **option 4** i.e.**21**

the ratio of efficiency of akash and lokesh = 2 : 1

together they finish the work = 7 days

total work = $7 \times (2 + 1) = 21$ unit

Lokesh alone finish the work = $21 / 1 = 21$

Question 34 :

Women invest Rs.100 at the start of each year at 5% compound interest per annum. How much will her investment be at the end of the 2nd year?

Difficulty : Moderate

Average Time : 54 Seconds

Options :

1. Rs. 215.25
2. Rs. 215.5
3. Rs. 215
4. Rs. 215.75

Solution :

The correct answer is **option 1** i.e. **Rs. 215.25**

Women invest Rs.100 at the start of each year at 5% compound interest per annum.

$$p_1 = 100$$

$$r = 5\%$$

$$t = 2 \text{ years}$$

formula used -

$$a = p (1 + r / 100)^n$$

$$a = 100 (1 + 5 / 100)^1$$

$$a = 100 (21 / 20) = 105 \text{ (for frist year)}$$

$$a = 105$$

$$p_2 = 105 + 100 = 205 \text{ (this is for second year)}$$

$$a_2 = 205 (21 / 20) = 215.25$$

**Question 35 :**

if the product two number is 2664 and their LCM is 74 , then their HCF is

Difficulty : Moderate**Average Time : 55 Seconds****Options :**

1. 34
2. 36
3. 64
4. 35

Solution :

The correct answer is **option 2** i.e. **36**

the product two number = 2664 , LCM = 74 , hcf = ?

we know that ,

product of two number = (lcm × hcf) of these two number

frist number × second number = lcm × hcf

2664 = 74 × hcf

hcf = 2664 / 74 = 36

Question 36 :

Find the missing term of the sequence. AB, BA, ABC, CBA, ABCD, ?

Difficulty : Moderate**Average Time : 48 Seconds****Options :**

1. DABC
2. DCBA
3. DBCA
4. DBAC

Solution :

The correct answer is **option 2** i.e. **DCBA**.

Understanding

Given series: AB, BA, ABC, CBA, ABCD, ?

The logic used here is:

AB, BA

Reverse BA.

Similarly;

ABCD, ?

Reverse ABCD.

ABCD, DCBA

The next term in the series is **DCBA**.

Hence, option 2 is the correct answer.

Question 37 :

Complete the series: A, Z, C, X, E, ?

Difficulty : Moderate

Average Time : 54 Seconds

Options :

1. F
2. W
3. V
4. H

Solution :

The correct answer is **option 3** i.e. **V**.

Understanding

Given series: A, Z, C, X, E, ?

The given series is alternated with two series:

1. A, C, E, ...

$$A + 2 = C$$

$$C + 2 = E$$

2. Z, X, ?

$$Z - 2 = X$$

$$X - 2 = V$$

The next term in the series is **V**.

Hence, option 3 is the correct answer.

Question 38 :

If ABSENT = BDVISZ, then SCHOOL will be coded as:

Difficulty : Moderate

Average Time : 55 Seconds

Options :

1. TKESSR

2. TEKSTR

3. TKERTS

4. TEKRRS

Solution :

The correct answer is **option 2** i.e. **TEKSTR**.

Understanding

Application

The logic used here is: ABSENT = BDVISZ A + 1 = B B + 2 = D S + 3 = V E + 4 = I N + 5 = S T + 6 = Z	Similarly, Code for the word SCHOOL: S + 1 = T C + 2 = E H + 3 = K O + 4 = S O + 5 = T L + 6 = R Hence, option 2 is the correct answer.
---	--

Question 39 :

If A denotes 'add', B denotes 'subtract', C denotes 'multiply' and D denotes 'divide', which of the following is correct?

Difficulty : Moderate**Average Time : 66 Seconds****Options :**

1. $8 C 8 A 8 D 8 B 8 = 57$
2. $36 C 4 D 8 B 7 A 4 = 10$
3. $32 D 8 C 9 = 160 B 12 C 12$
4. $16 C 12 A 49 D 7 B 9 = 200$

Solution :

The correct answer is **option 1** i.e. $8 C 8 A 8 D 8 B 8 = 57$.

Understanding

Given Conditions: A denotes '+', B denotes '-',
C denotes 'x' and D denotes '÷'

Check all the options:

Option 1: $8 \times 8 + 8 \div 8 - 8 = 57$

After replacement the equation becomes;

$$= 8 \times 8 + 8 \div 8 - 8$$

$$= 57 \text{ is equal to } 57.$$

Hence, **option 1** is the correct answer.

Option 2: $36 \times 4 \div 8 - 7 + 4 = 10$

After replacement the equation becomes;

$$= 36 \times 4 \div 8 - 7 + 4$$

$$= 15 \text{ is not equal to } 10.$$

Hence, **option 2** is not the correct answer.

Option 3: $32 \div 8 \times 9 = 160 - 12 \times 12$

After replacement the equation becomes;

$$= 32 \div 8 \times 9 = 160 - 12 \times 12$$

$$= 36 \text{ is not equal to } 16.$$

Hence, **option 3** is not the correct answer.

Option 4: $16 \times 12 + 49 \div 7 - 9 = 200$

After replacement the equation becomes;

$$= 16 \times 12 + 49 \div 7 - 9$$

$$= 190 \text{ is not equal to } 200.$$

Hence, **option 4** is not the correct answer.

Question 40 :

A question and two statements labeled (I) (II) are given. You have to decide Which statement(s) is/are sufficient to answer

the question. How many brothers does Dinesh have? I. Dinesh's mother has three children. II. Dinesh has two sisters.

Difficulty : Moderate

Average Time : 107 Seconds

Options :

1. Statement II alone is sufficient
2. Both the statements together are needed
3. Statement I alone is sufficient
4. Either I or II alone is sufficient

Solution :

The correct answer is **option 2** i.e. **Both the statements together are needed.**

Understanding

In the diagram shown;

Square shows males, the circle shows females, vertical lines show generations, a single horizontal line shows brothers or sisters and double lines show a couple.

To draw the above diagram both the statements are needed.

From that, we can conclude that Dinesh has no brother.

Hence, **Both Statements I and II together are necessary.**

Question 41 :

Q3C, S5E, U8G, W12I, _____

Difficulty : Moderate

Average Time : 72 Seconds

Options :

1. X17K
2. Y15K
3. Z15K
4. Y17K

Solution :

The correct answer is **option 4** i.e. Y17K.

Understanding

Given series: Q3C, S5E, U8G, W12I,

The logic used here is:

Q3C, S5E

$$Q + 2 = S$$

$$3 + 2 = 5$$

$$C + 2 = E$$

S5E, U8G

$$S + 2 = U$$

$$5 + 3 = 8$$

$$E + 2 = G$$

U8G, W12I

$$U + 2 = W$$

$$8 + 4 = 12$$

$$G + 2 = I$$

Similarly;

W12I, _____

$$W + 2 = Y$$

$$12 + 5 = 17$$

$$I + 2 = K$$

The next term in the series is **Y17K**.

Hence, option 4 is the correct answer.

Question 42 :

One day, Ganesh left home and cycled 10 km southwards, turned right and cycled 5 km; turned right and cycled 10km and finally turned left and cycled 10km. How many kilometers will he have to cycle to reach his home straight?

Difficulty : Moderate

Average Time : 77 Seconds

Options :

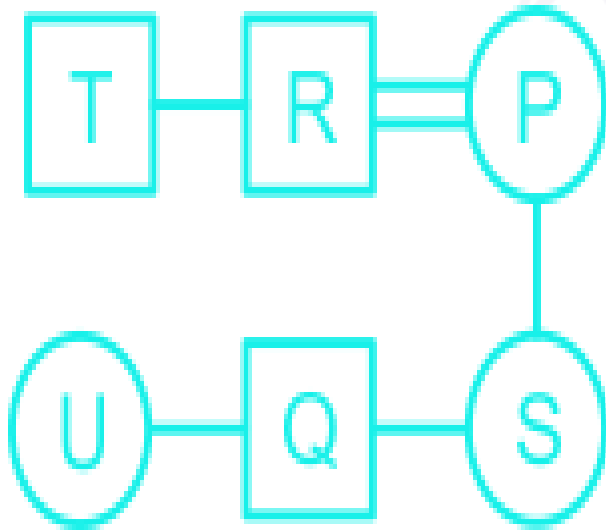

1. 30
2. 15
3. 25
4. 35

Solution :

The correct answer is **option 2** i.e. 15.

Understanding

According to the question, the figure is as follows:

From the above figure,

Ganesh has to cycle = $OC + CD = 10 + 5 = 15\text{km}$ to reach his home straight.

Hence, **option 2** is the correct answer.

Question 43 :

If $>$ denotes '+', $<$ denotes '-', \div denotes ' \div ', \times denotes ' \times ', $=$ denotes '=', and $-$ denotes '=', choose the correct statement from the following

Difficulty : Moderate

Average Time : 59 Seconds

Options :

1. $14+7>3=6+3>2$
2. $6+3>8=4+21$
3. $96+3=7>4$
4. $4>6+2\times 32+41$

Solution :

The correct answer is **option 3** i.e. $96+3=7>4$.

Understanding

Given Condition: > denotes '+', denotes '-',
+ denotes '÷', x denotes "=", = denotes "=", and -
denotes '≡'

Check all the options:

Option 1: $14+7>3=6+3>2$

After replacement the equation becomes;

$$= 14 \div 7 + 3 \ 6 \div 3 + 2$$

$$= 5 \text{ is not less than } 4$$

Hence, option 1 is not the correct answer.

Option 2: $6+3>8=4+21$

After replacement the equation becomes;

$$= 6 \div 3 + 8 \ 4 \div 2 - 1$$

$$= 10 \text{ is not less than } 1$$

Hence, **option 2** is not the correct answer.

Option 3: $96+3=7>4$

After replacement the equation becomes;

$$= 9 - 6 \div 3 \quad 7 + 4$$

= 7 is less than 11

Hence, option 3 is the correct answer.

Option 4: $4>6+2 \times 32+41$

After replacement the equation becomes;

$$= 4 + 6 \div 2 > 32 \div 4 - 1$$

= 7 is equal to 7.

Hence, **option 4** is not the correct answer.

Question 44 :

Arun is facing North-West. He first turns 90° in the clockwise direction, and then another 180° in the anticlockwise direction. Later he turns 90° again in the anticlockwise direction. Which direction is he facing now?

Difficulty : Moderate

Average Time : 109 Seconds

Options :

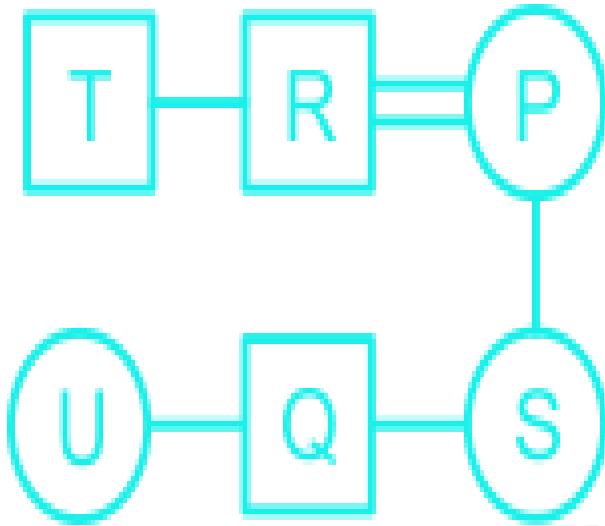

1. South
2. West
3. South-East
4. South-West

Solution :

The correct answer is **option 3** i.e. **South-East**.

Understanding

According to the question, the figure is as follows:

From the above figure, he is facing South-East direction now.

Hence, **option 3** is the correct answer.

Question 45 :

Choose the odd one from the following:

Difficulty : Moderate

Average Time : 50 Seconds

Options :

1. FOOTBALL
2. CHESS
3. BASEBALL
4. HOCKEY

Solution :

The correct answer is **option 2** i.e. **CHESS**.

Understanding

Application

The logic used here is: Football, Baseball, and Hockey are outdoor games.	Whereas; Chess is not an outdoor game. Hence, option 2 is the correct answer.
--	--

Question 46 :

The given information is followed by two statements. Read them carefully and answer the given question. Many parents have pleaded with the administration department of school X to discontinue the rule of wearing ties to school. (A) The school has kept different coloured ties for different academic scorers as part of their uniform. Thus, the low-scoring children of school feel discriminated (B) The sports uniform of the school does not have a tie, anyway. It is to be worn only on Wednesday.

Difficulty : Moderate

Average Time : 68 Seconds

Options :

1. Both Statement A and Statement B weaken the argument
2. Statement A weakens but Statement B strengthens the argument
3. Statement A strengthens the argument and Statement B is a neutral statement
4. Statement B weaknes but Statement A strengthens the argument

Solution :

The correct answer is **option 3** i.e. **Statement A strengthens the argument and Statement B is a neutral statement**

Understanding

From I alone, we can say that the low-scoring children feel discriminated against high-scoring children. So, this can be the reason why their parents are pleading school to discontinue the rule of the tie. This strengthens the statement.

From II, we can say that it is a neutral statement.

Hence, **Statement A strengthens the argument and Statement B is a neutral statement**

Question 47 :

Comprehension: In a class of 25 students of mathematics and Computer Science, 12 students have taken Mathematics. Out of this 8 have taken Mathematics but not Computer Science What is the number of students who have both mathematics and Computer Science?

Difficulty : Moderate

Average Time : 75 Seconds

Options :

1. 4
2. 17
3. 2
4. 1

Solution :

The correct answer is **option 1** i.e. 4.

Understanding

In a class of 25 students of mathematics and Computer Science, 12 students have taken Mathematics. Out of this 8 have taken Mathematics but not Computer Science

Students who have taken both the subjects =
 $(12 - 8) = 4$

Question 48 :

Comprehension: In a class of 25 students of mathematics and Computer Science, 12 students have taken Mathematics. Out of this 8 have taken Mathematics but not Computer Science What is the number of students who have taken Computer Science but not Mathematics?

Difficulty : Moderate**Average Time : 52 Seconds****Options :**

1. 13
2. 4
3. 8
4. 12

Solution :

The correct answer is **option 1** i.e. **13**.

Understanding

In a class of 25 students of mathematics and Computer Science, 12 students have taken Mathematics. Out of this 8 have taken Mathematics but not Computer Science

Students who have taken both the subjects =
 $(12 - 8) = 4$

The number of students who have taken
Computer Science but not Mathematics = $25 - 12 = 13$

**Question 49 :**

PALE: LEAP::POSH:?

Difficulty : Moderate

Average Time : 48 Seconds

Options :

1. HSPO
2. HSOP
3. POHS
4. SHOP

Solution :The correct answer is **option 4** i.e. **SHOP**.

Understanding	Application
The logic used here is: PALE: LEAP	Similarly, POSH:? Hence, option 4 is the correct answer.

Question 50 :

A family has 6 members P, Q, R, S, T, and U. Q is the son of R, but R is not the mother of Q. P and R are a married couple. T is the brother of R. S is the daughter of P. U is the sister of Q. Who is the son P?

Difficulty : Moderate

Average Time : 59 Seconds

Options :

1. None of the given option
2. R
3. Q
4. T

Solution :The correct answer is **option 3** i.e. **Q**.

Understanding	Application
<p>In the diagram shown;</p> <p>Square shows males, the circle shows females, vertical lines show generations, a single horizontal line shows brothers or sisters and double lines show a couple.</p>	<p>Thus considering the figure, Q is the son P.</p> <p>Considering all the four options the most appropriate is option 3.</p>

Question 51 :

A family has 6 members P, Q, R, S, T, and U. Q is the son of R, but R is not the mother of Q. P and R are a married couple. T is the brother of R. S is the daughter of P. U is the sister of Q. How many brothers does U have?

Difficulty : Moderate

Average Time : 74 Seconds

Options :

1. 3
2. None
3. 2
4. 1

Solution :

The correct answer is **option 4** i.e. 1.

Understanding	Application
---------------	-------------

In the diagram shown;
Square shows males, the circle shows females, vertical lines show generations, a single horizontal line shows brothers or sisters and double lines show a couple.

Thus considering the figure, U has only 1 brother.

Considering all the four options the most appropriate is option 1.

Question 52 :

A family has 6 members P, Q, R, S, T, and U. Q is the son of R, but R is not the mother of Q, P and R are a married couple T is the brother of R. S is the daughter of P. U is the sister of Q. What is the ratio of Males to Females in this family?

Difficulty : Moderate

Average Time : 71 Seconds

Options :

1. 5:1
2. 2:1
3. 1:1
4. 1:2

Solution :

The correct answer is **option 3** i.e. 1:1.

Understanding

Application

In the diagram shown;
Square shows males, the circle shows females, vertical lines show generations, a single horizontal line shows brothers or sisters and double lines show a couple.

Thus considering the figure, the ratio of Males to Females in this family is 1:1.

Considering all the four options the most appropriate is option 3.

Question 53 :

ACE: FHJ:: OQS:?

Difficulty : Moderate

Average Time : 59 Seconds

Options :

1. TVX
2. PRS
3. TXV
4. RPS

Solution :

The correct answer is **option 1** i.e. TVX.

Understanding

Application

The logic used here is:	Similarly,
ACE: FHJ	OQS:?
$A + 5 = F$	$O + 5 = T$
$C + 5 = H$	$Q + 5 = V$
$E + 5 = J$	$S + 5 = X$
	Hence, option 1 is the correct answer.

Question 54 :

If P means 'subtraction', Q means 'division', R means 'addition' and S means 'multiplication', then $15 Q 3 R 24 P 12 S 2 = ?$

Difficulty : Moderate

Average Time : 59 Seconds

Options :

1. 7
2. 5
3. 29
4. 9

Solution :

The correct answer is **option 2** i.e. 5.

Understanding

Given Equation: $15 Q 3 R 24 P 12 S 2 = ?$

Given condition: 'P' means '-', 'Q' means '÷',
'R' means '+' and 'S' means 'x'

After replacement the equation becomes;

$$= 15 \div 3 + 24 - 12 \times 2$$

$$= 5$$

Hence, **option 2** is the correct answer.

Question 55 :

If RACE is coded as 4973, FACT is coded as 1795, and FORCE is coded as 16493, then what is the code of REACT?

Difficulty : Moderate

Average Time : 54 Seconds

Options :

1. 43759
2. 43975
3. 43579
4. 43795

Solution :

The correct answer is **option 4** i.e. **43795**.

Understanding	Application
---------------	-------------

The logic used here is:

RACE is coded as 4973,
FACT is coded as 1795,
and FORCE is coded as 16493

R = 4

A = 9

C = 7

E = 3

F = 1

A = 7

C = 9

T = 5

F = 1

O = 6

R = 4

C = 9

E = 3

Similarly,

Code for the word REACT:

R = 4

E = 3

A = 7

C = 9

T = 5

Hence, **option 4** is the correct answer.

Question 56 :

_____, 9, 25, 49, 121, 169

Difficulty : Moderate

Average Time : 64 Seconds

Options :

1. 1

2. 3

3. 2

4. 4

Solution :

The correct answer is **option 4** i.e. **4**.

Understanding

Given series: _____, 9, 25, 49, 121, 169

The logic used here is:

$$2^2 = 4$$

$$3^2 = 9$$

$$5^2 = 25$$

$$7^2 = 49$$

$$9^2 = 81$$

$$11^2 = 121$$

$$13^2 = 169$$

The missing term in the series is **4**.

Hence, option 4 is the correct answer.

Question 57 :

A question and two statements labeled (I), (II) are given. You have to decide which statement(s) is /are sufficient for the question What time did the train leave today? I. The train normally leaves on time. II. The train normally leaves at 15:30hrs.

Difficulty : Moderate

Average Time : 63 Seconds

Options :

1. Statement I alone is sufficient
2. Data insufficient
3. Both the statement together are needed
4. Statement II alone is sufficient

Solution :

The correct answer is **option 2** i.e. **Data insufficient**.

Understanding

From I and II we cannot decide about the train time of today.

Hence, **Data is insufficient to answer the question.**

Question 58 :

Read the following set of information and answer the question below, i. Rekha is younger than Sumitha but elder than Reena. ii. Reena is elder than Gayathri. iii. Sharmila is elder to Reena but younger than Rekha. Who is the youngest of all?

Difficulty : Moderate

Average Time : 56 Seconds

Options :

1. Sumitha
2. Rekha
3. Sharmila
4. Gayathri

Solution :

The correct answer is **option 4** i.e. **Gayathri**.

Understanding

From I;

Sumitha > Rekha > Reena

From II;

Sumitha > Rekha > Reena > Gayathri

From III;

Sumitha > Rekha > Sharmila > Reena > Gayathri

Hence, Gayatri is the youngest.

Hence, **option 4** is the correct answer.

Question 59 :

Select the combination of numbers so that letters arranged accordingly will form a meaningful English word U T E Y B A 1 2 3 4 5 6

Difficulty : Moderate

Average Time : 63 Seconds

Options :

1. 536124
2. 563214
3. 536214
4. 563124

Solution :

The correct answer is **option 1** i.e. **536124**.

Understanding

Arrange the proper combination of numbers so that letters arranged accordingly will form a meaningful English word

Given:

U T E Y B A
1 2 3 4 5 6

After arranging the numbers the word formed is:

BEAUTY = 536124

Hence, **option 1** is the correct answer.

Question 60 :

IF COME is coded as EMOC, then TRAIN is coded as:

Difficulty : Moderate

Average Time : 56 Seconds

Options :

1. NIRAT

NAIRT

3. NIART

4. NRIAT

Solution :The correct answer is **option 3** i.e. **NIART**.

Understanding	Application
The logic used here is: COME is coded as EMOG Reverse the given code.	Similarly, Code for the word TRAIN: TRAIN = NIART Hence, option 3 is the correct answer.

Question 61 :

Flower: Bud:: Plant:?

Difficulty : Moderate**Average Time : 50 Seconds****Options :**

1. Flower
2. Twig
3. Seed
4. Taste

Solution :The correct answer is **option 3** i.e. **Seed**.

Understanding	Application
---------------	-------------

The logic used here is: Flower: Bud A bud grows into a Flower.	Similarly, Plant:? A seed grows into a Plant. Hence, option 3 is the correct answer.
--	--

Question 62 :

Find the similarity among the following: July, October, January, June

Difficulty : Moderate

Average Time : 51 Seconds

Options :

1. The months preceding them all have 31 days
2. All of them have 31 days
3. They have more days than the months succeeding them
4. There is no clear similarity between them

Solution :

The correct answer is **option 4** i.e. **There is no clear similarity between them.**

Understanding

July, October, January, and June have no clear similarity between them.

Hence, **option 4** is the correct answer.

Question 63 :

Four letters are given out of which three are alike in a certain manner, while one is different. Select the odd one.

Difficulty : Moderate

Average Time : 54 Seconds

Options :

1. E
2. O

T

4. Z

Solution :

The correct answer is **Option 4** i.e. **Z**

Understanding

The place value of E is 5.

The place value of O is 15.

The place value of T is 20.

The place value of Z is 26.

Place values of E, O, and T are multiples of 5, whereas the place value of Z is not a multiple of 5.

Question 64 :

Four words have been given, out of which three are alike in a certain manner and one is different. Select the odd word.

Difficulty : Moderate

Average Time : 55 Seconds

Options :

1. Bharatnatyam
2. Bihu
3. Garhwali
4. Ballet

Solution :

The correct answer is **option 4** i.e. **Ballet**

Understanding

Bharatnatyam, Bihu, and Garhwali are all Indian folk dance forms.

On the other hand, Ballet is not an Indian dance form. It is a dance form of the west.

Hence, **Ballet** is an odd option.

Question 65 :

Find out the odd word/letters/number pair from the given alternatives.

Difficulty : Moderate

Average Time : 51 Seconds

Options :

1. Moscow
2. Washington D.C
3. Karachi
4. Tokyo

Solution :

The correct answer is **Option 3** i.e. **Karachi**

Understanding	Application
1. Moscow is the capital of Russia. 2. Washington D.C is the capital of America. 4. Tokyo is the capital of Japan.	3. But Karachi is a city in Pakistan, whose capital is Islamabad. Hence, the correct answer is Karachi .

Question 66 :

Complete the following series. 2, 6, 12, 20, ?

Difficulty : Moderate

Average Time : 52 Seconds

Options :

1. 60
2. 30
3. 20
4. 40

Solution :

The correct answer is **option 2** i.e. **30**

Understanding

Given: 2, 6, 12, 20, ?

Pattern:

$$1^2 + 1 = 2$$

$$2^2 + 2 = 6$$

$$3^2 + 3 = 12$$

$$4^2 + 4 = 20$$

Application

Next number will be:

$$5^2 + 5 = \mathbf{30}$$

Question 67 :

Complete the following series. G19L, Q39V, A7F, K27P, U47Z, ?

Difficulty : Moderate

Average Time : 47 Seconds

Options :

1. K17F
2. J15E
3. E15J
4. F17K

Solution :

The correct answer is **option 3** i.e. **E15J**

Understanding	Application
<p>Each letter is written by adding five letters to its previous letter and the number written between two letters is the sum of the positional values of its adjacent letters.</p> <p>Given: G19L, Q39V, A7F, K27P, U47Z, ?</p> <p>For letters: $G + 5 = L$, $L + 5 = Q$, $Q + 5 = V$, $V + 5 = A$, $A + 5 = F$, $F + 5 = K$, $K + 5 = P$, $P + 5 = U$, $U + 5 = Z$, $Z + 5 = E$, $E + 5 = J$</p> <p>For numbers: $GL = 7 + 12 = 19$, $QV = 17 + 22 = 39$, $AF = 1 + 6 = 7$, $KP = 11 + 16 = 27$, $U + Z = 21 + 26 = 47$, $EJ = 5 + 10 = 15$</p>	<p>Thus, final answer is 'E15J'.</p>

Question 68 :

Complete the following series. 1, 2, 6, 12, 20, ?

Difficulty : Moderate

Average Time : 62 Seconds

Options :

- 30
- 26
- 28
- 32

Solution :

The correct answer is **option 1** i.e. **30**

Understanding

Given : 1, 2, 6, 12, 20, ?

$$1 \times 2 = 2$$

$$2 \times 3 = 6$$

$$3 \times 4 = 12$$

$$4 \times 5 = 20$$

$$5 \times 6 = 30$$

Application

Next number will be:

$$5 \times 6 = \mathbf{30}$$

Question 69 :

Choose the correct pair of signs that need to be interchanged in order to make the given equation correct. $14 \times 2 - 3 + 10 / 2 = 13$

Difficulty : Moderate

Average Time : 46 Seconds

Options :

1. +, -

2. x, -

3. x, /

4. x, +

Solution :

The correct answer is **option 2** i.e. x, -

Understanding

Given equation: $14 \times 2 - 3 + 10 / 2 = 13$

This equation becomes correct if we interchange 'x' and '-' signs:

$$14 - 2 \times 3 + 10 / 2$$

$$= 14 - 6 + 5$$

$$= 19 - 6$$

$$= 13$$

Hence, option 2 is the correct answer.

Question 70 :

In the following question, select the missing letter from the series: H ? F L G J U M Q

Difficulty : Moderate

Average Time : 49 Seconds

Options :

1. B

2. D

3. C

4. E

Solution :

The correct answer is **option 4** i.e. **E**

The pattern followed here is:

The number in [Row 1, Column 1] = [Number representing U - Number representing L] - 1 = 9 - 1 = 8 [H]

The number in [Row 1, Column 2] = [Number representing M - Number representing G] - 1 = 6 - 1 = 5 [E]

The number in [Row 1, Column 3] = [Number representing Q - Number representing J] - 1 = 7 - 1 = 6 [F]

Question 71 :

Which one of the following is NOT a key vision area under the "Digital India Programme"?

Difficulty : Moderate

Average Time : 49 Seconds

Options :

Documentaries on digital awareness
