Seating Arrangement And Puzzle Questions Solution

The correct answer is **Option 1** i.e. **451**

Explanation:

When we observe the given machine output, it is clear that there are ten three-digit numbers and they are changed step by step along with changing their position. In the first step, two different operations with different digits take place where the highest number is taken to the extreme left and the lowest number is taken to the extreme right after which 5 is subtracted from both of them. In the second step, the second highest number is taken to the extreme left, and the second lowest number is taken to the extreme right where 5 is subtracted from them. As a result, the two digits on which operations were done in step 1 move to their right and left respectively. The process continues till step 5.
