Series Questions Solution

The correct answer is **Option 3** i.e. **3**

Logic: Each time the elements move together, they move one space to the right. Once they reach the rightmost position, they move to the leftmost place in the following phase. Additionally, the first (uppermost) and third components switch places in the first step; the second and fourth elements switch places in the second step; and none of the elements change places in the third step. To continue the series, these three stages are repeated.

So, 3 will complete the series.
