

## Statistics Questions Overview

Statistics Questions have a good weightage in the Ssc Cgl Exam and the type of question asked in Ssc Cgl exam is similar to the question mentioned below. It has been solved and explained by KD Live Experts under the guidance of Neetu Mam and they have tried to elaborate the concept used in Statistics Questions.

## Question On Statistics

A student writes numbers from 1 - 9 on a blackboard such that he writes 1 one time, 2 two times, 3 three times, and so on till he writes 9 nine times. Find the median of the numbers written on the board.

Difficulty : Moderate

Average Time : 36 Seconds

## Statistics Questions Options

1. 5
2. 6
3. 7
4. 8

## Statistics Questions Solution

The correct answer is **option 3** i.e. 7

Concept: If numbers are written in increasing or decreasing order, the middle number is median or if the number of terms is even, the average of two terms is in the middle.

Total number of terms = sum of numbers up to 9 =  $(9 \times 10)/2 = 45$

There are 45 terms, so 23rd term will be the median.

$$1 + 2 + 3 + 4 + 5 + 6 = 21$$

Now there will be 7 sevens, so median is 7.

## Statistics Questions Tips and Tricks

1. Try to solve Statistics Questions without taking any help from the solutions.
2. Statistics Questions require proper usage of concept so firstly read the question thoroughly and then use the right concept.
3. In case you're not able to solve the question in less than 30 seconds in the exam then you should skip the question and move to the next question.

## Daily Current Affairs

KD Live is providing Current Affairs on a daily basis for SSC and a current affairs quiz too for the practice. For the Current Affairs please [Click Here](#) and for the current affairs quiz please [Click Here](#).
