

Statistics Questions Overview

Statistics Questions have a good weightage in the Ssc Cgl Exam and the type of question asked in Ssc Cgl exam is similar to the question mentioned below. It has been solved and explained by KD Live Experts under the guidance of Neetu Mam and they have tried to elaborate the concept used in Statistics Questions.

Question On Statistics

The mean of 5 numbers is 17. If the difference between two consecutive numbers is 3 and the third number is the same as the mean value of all 5 numbers, then find the difference between the sum of the last two numbers and the first two numbers.

Difficulty : Moderate

Average Time : 38 Seconds

Statistics Questions Options

1. 15
2. 18
3. 21
4. 12

Statistics Questions Solution

The correct answer is **option 2** i.e. **18**.

Third number = Mean = 17

Difference = 3

4th number = $17 + 3 = 20$

5th number = $20 + 3 = 23$

2nd number = $17 - 3 = 14$

1st number = $14 - 3 = 11$

$(11 + 14 + 17 + 20 + 23)/5 = 85/5 = 17$

Difference between last two and first two numbers = $(23 + 20) - (11 + 14) = (43) - (25) = 18$

Statistics Questions Tips and Tricks

1. Try to solve Statistics Questions without taking any help from the solutions.
2. Statistics Questions require proper usage of concept so firstly read the question thoroughly and then use the right concept.
3. In case you're not able to solve the question in less than 30 seconds in the exam then you should skip the question and move to the next question.
