

Time Speed And Distance Questions Overview

Time Speed And Distance Questions have a good weightage in the Ssc Chsl Exam and the type of question asked in Ssc Chsl exam is similar to the question mentioned below. It has been solved and explained by KD Live Experts under the guidance of Neetu Mam and they have tried to elaborate the concept used in Time Speed And Distance Questions.

Question On Time Speed And Distance

Two stations A and B are x km apart. Two trains start from the stations at same time towards each other. The train starting from station A has a speed of 50 km/hr. It takes 7.5 minutes for both trains to meet. If the speed of the train B is increased by 20 km/hr, it will take 6 minutes for both train to meet. What is the value of x?

Difficulty : Moderate

Average Time : 47 Seconds

Time Speed And Distance Questions Options

1. 9
2. 10
3. 12
4. 16

Time Speed And Distance Questions Solution

The correct answer is **Option 2** i.e. **10**.

Let the original speed of train B = y km/hr

Time taken to meet = Distance between them/Sum of their speeds

$$7.5/60 = x/(50 + y) \text{ [60 minutes = 1 hr]}$$

$$1/8 = x/(50 + y)$$

$$8x = 50 + y \text{ ---- 1}$$

When speed is increased by 20 km/hr

$$6/60 = x/(50 + y + 20)$$

$$1/10 = x/(70 + y)$$

$$10x = 70 + y \text{ ---- 2}$$

Equation 2 – Equation 1

$$2x = 20$$

$$x = 10$$

Time Speed And Distance Questions Tips and Tricks

1. Try to solve Time Speed And Distance Questions without taking any help from the solutions.
2. Time Speed And Distance Questions require proper usage of concept so firstly read the question thoroughly and then use the right concept.
3. In case you're not able to solve the question in less than 30 seconds in the exam then you should skip the question and move to the next question.

Daily Current Affairs

KD Live is providing Current Affairs on a daily basis for SSC and a current affairs quiz too for the practice. For the Current Affairs please [Click Here](#) and for the current affairs quiz please [Click Here](#).
